

Best Industry For Start-up

Overview

Problem

We want to choose an industry that is profitable with appropriate costs for our start-up company to join.

Solution

We did research on a Kaggle dataset to make a data-driven decision.

Why It Matters

By using data, we make sure that we would allocate the resources effectively.

INTRODUCTION

Objective

Main Goal

To choose the best industry to join.

Supporting Objectives

- Which industries are most profitable ?
- Between those industries, which should we choose ?

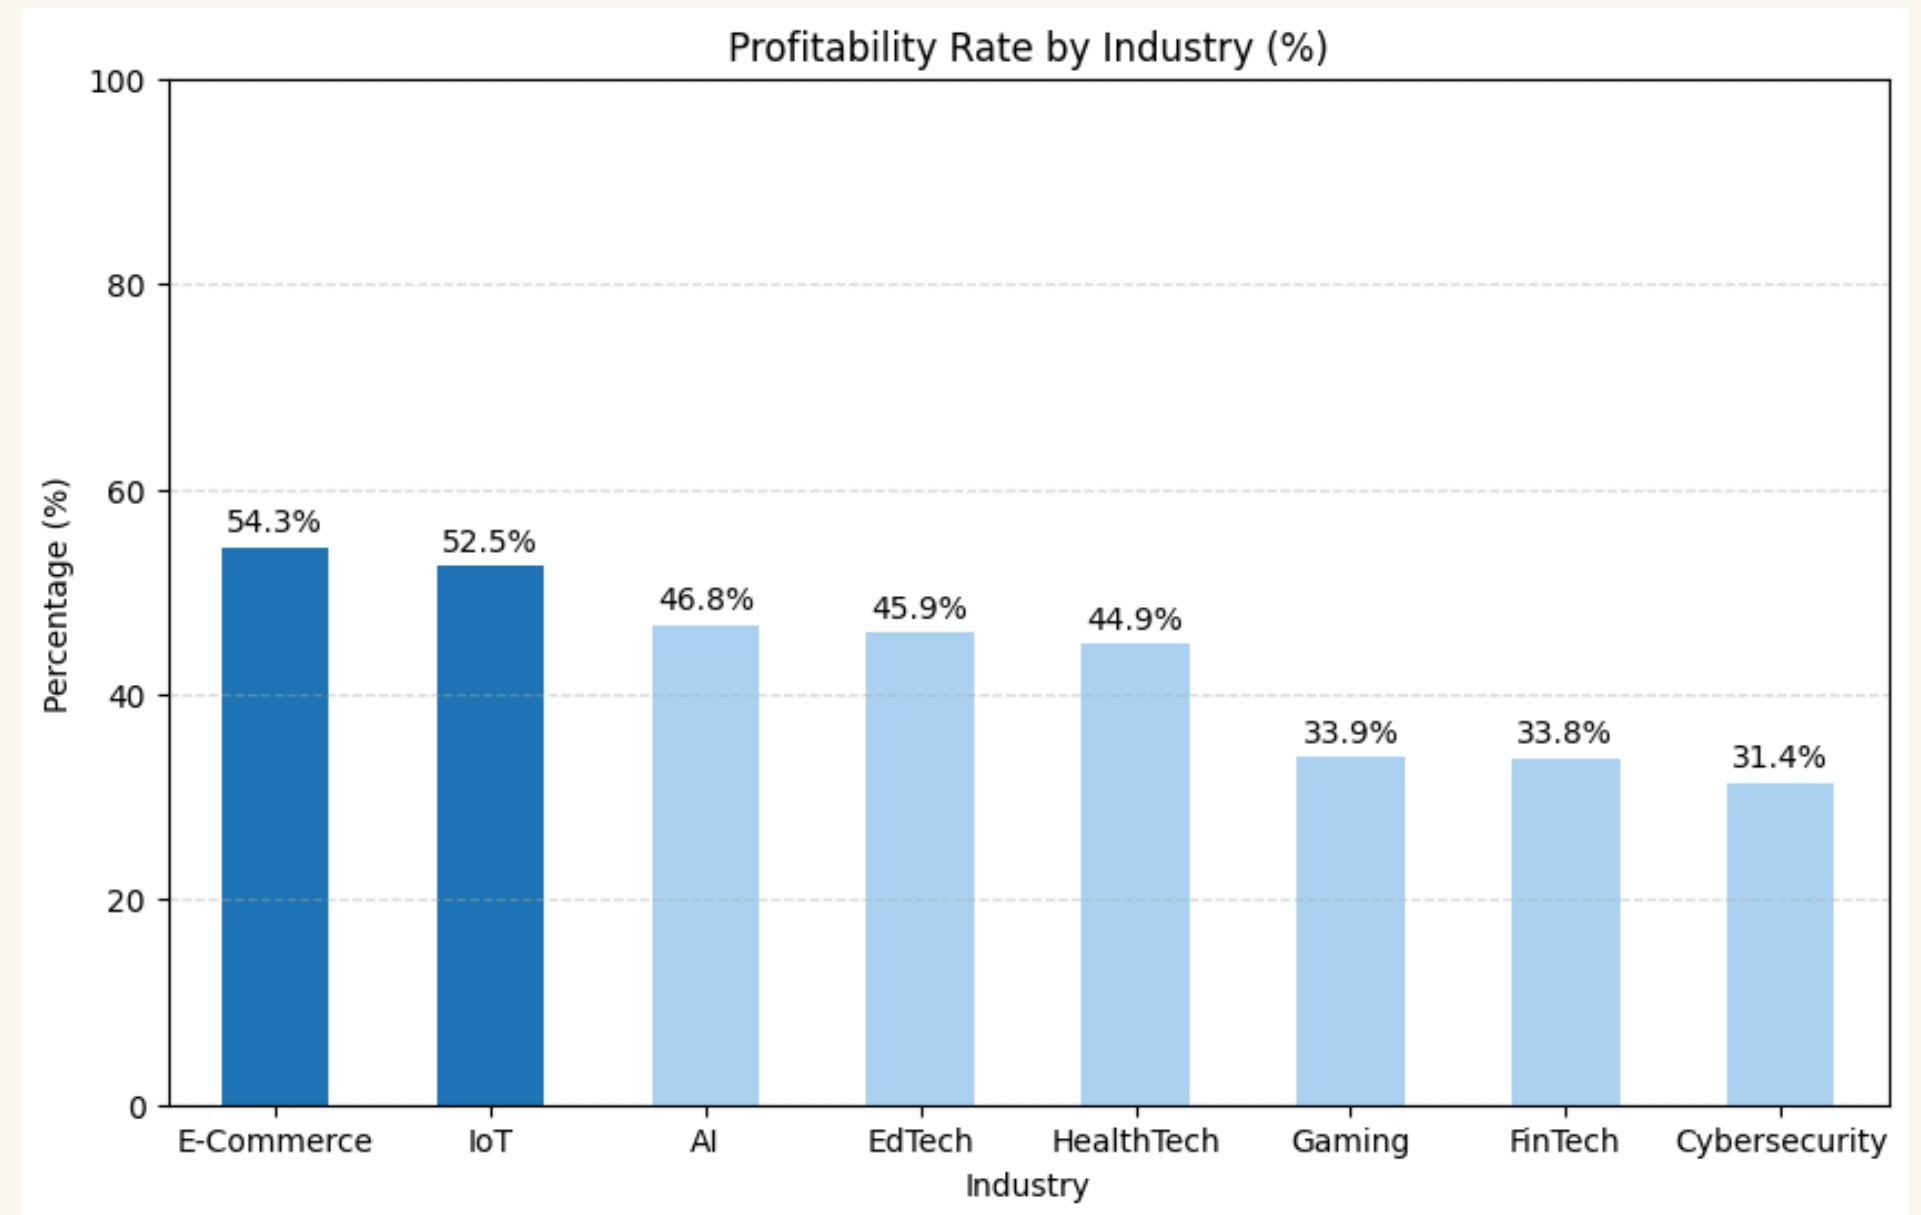

INDUSTRIES LIST

Profitable Rate

E-Commerce and IoT are the 2 industries with the highest Profitable Rate. With:

- E-Commerce: 38/70 companies are profitable (54.3%)
- IoT: 32/61 companies are profitable (52.5%)

Which to choose

E-Commerce

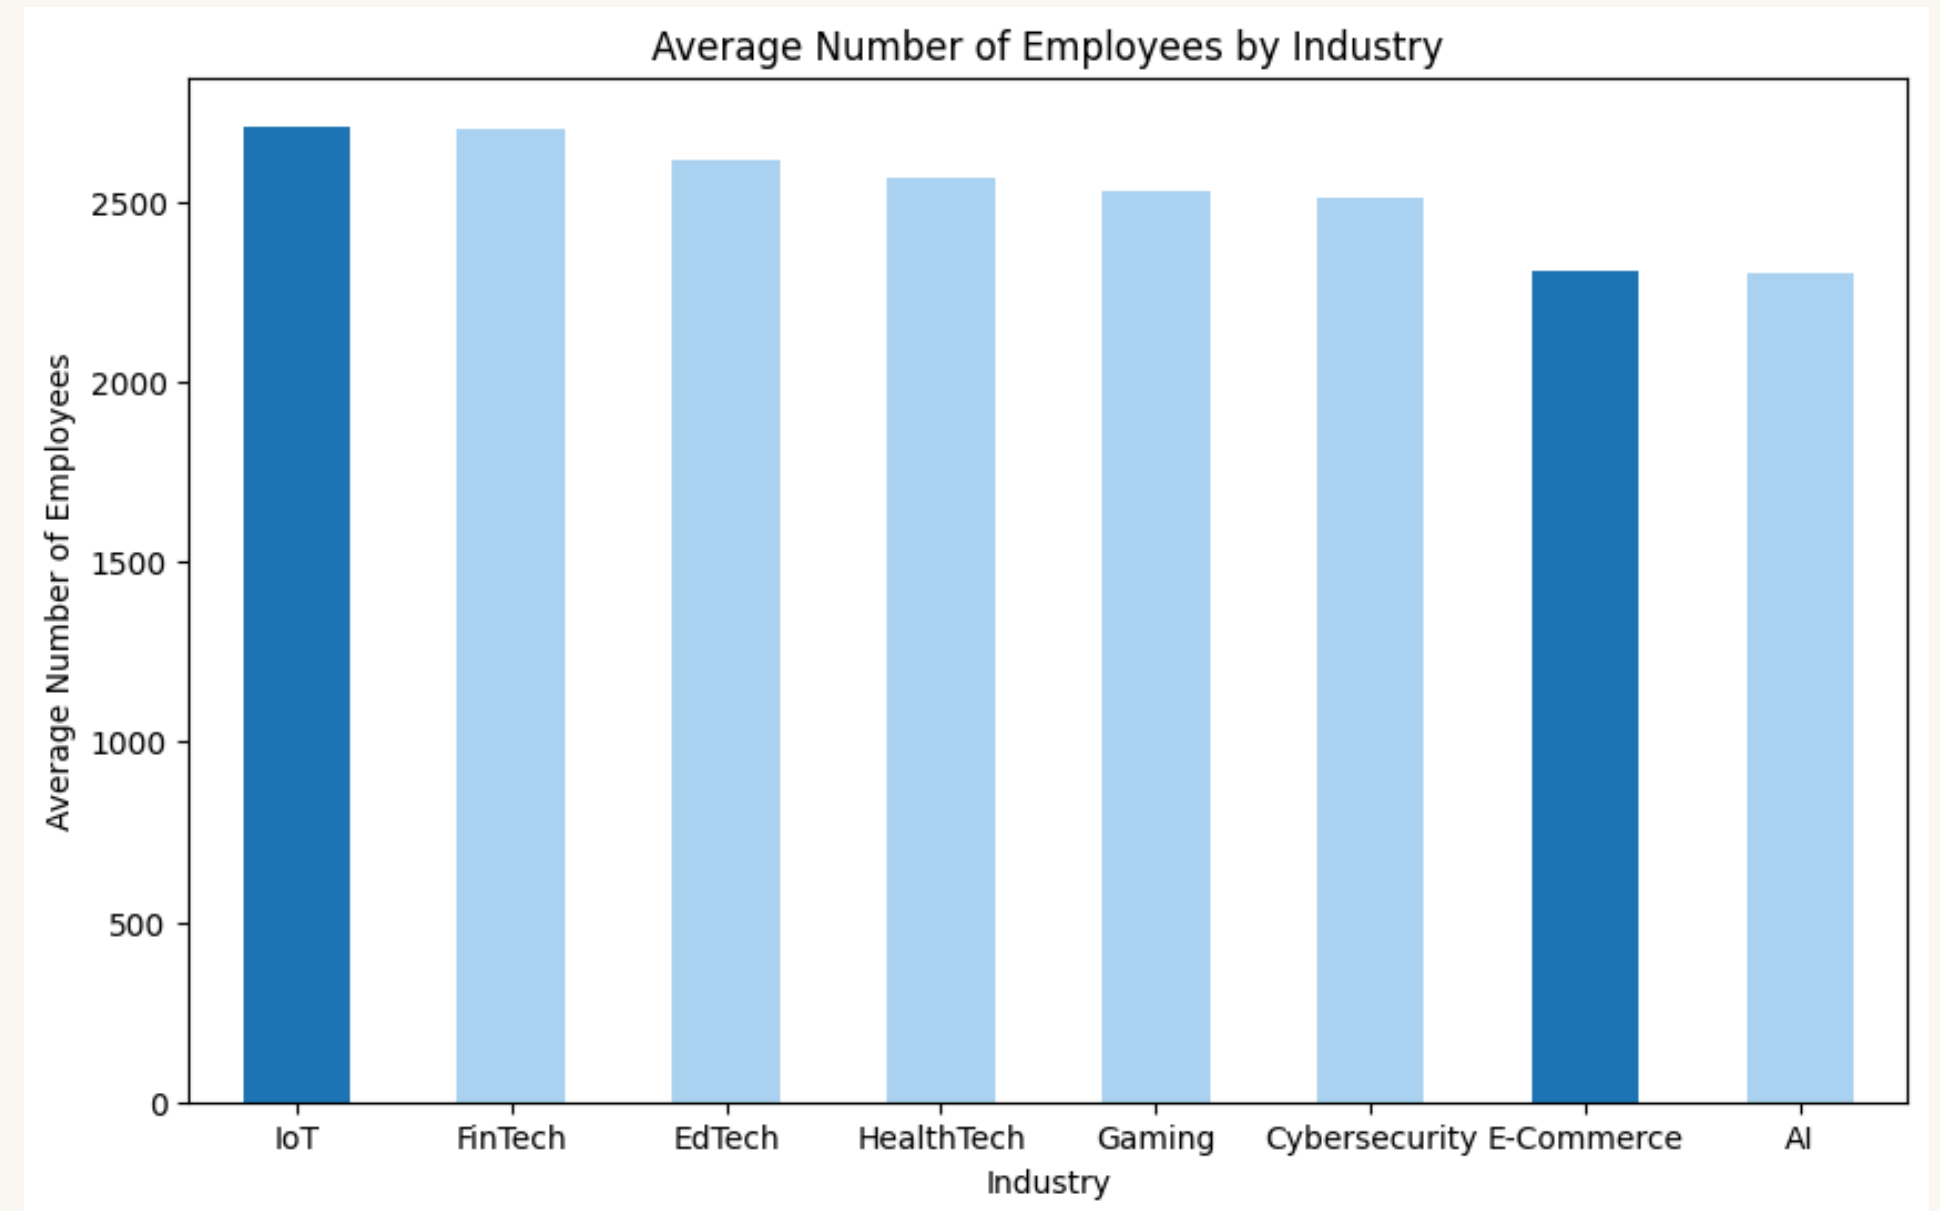

IoT

Number of Employees

IoT has the highest mean number of employees per company:

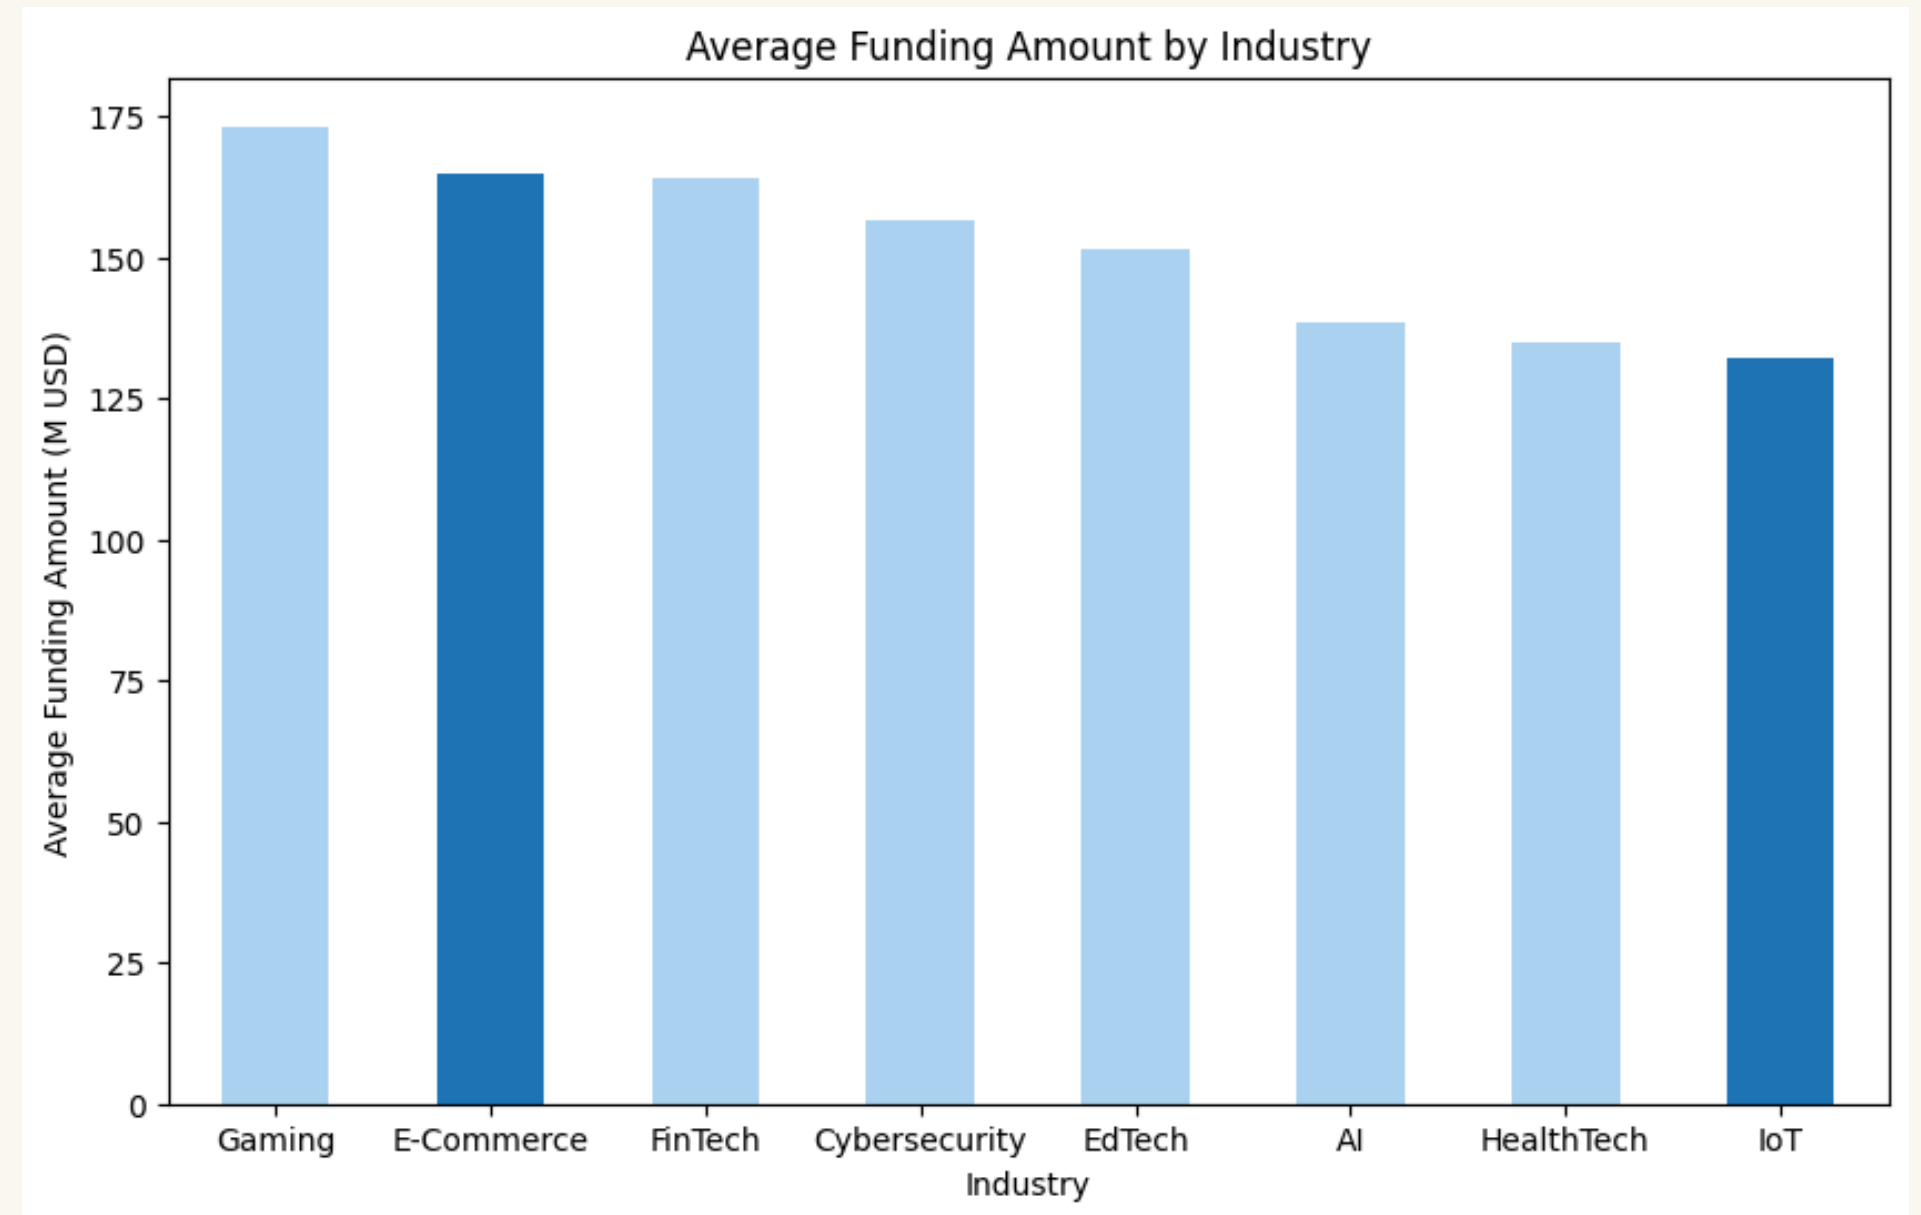

- E-Commerce: 2306.2 (employees/company)
- IoT: 2709.7 (employees/company)

Funding Amount

E-Commerce has higher average Funding Amount than IoT:

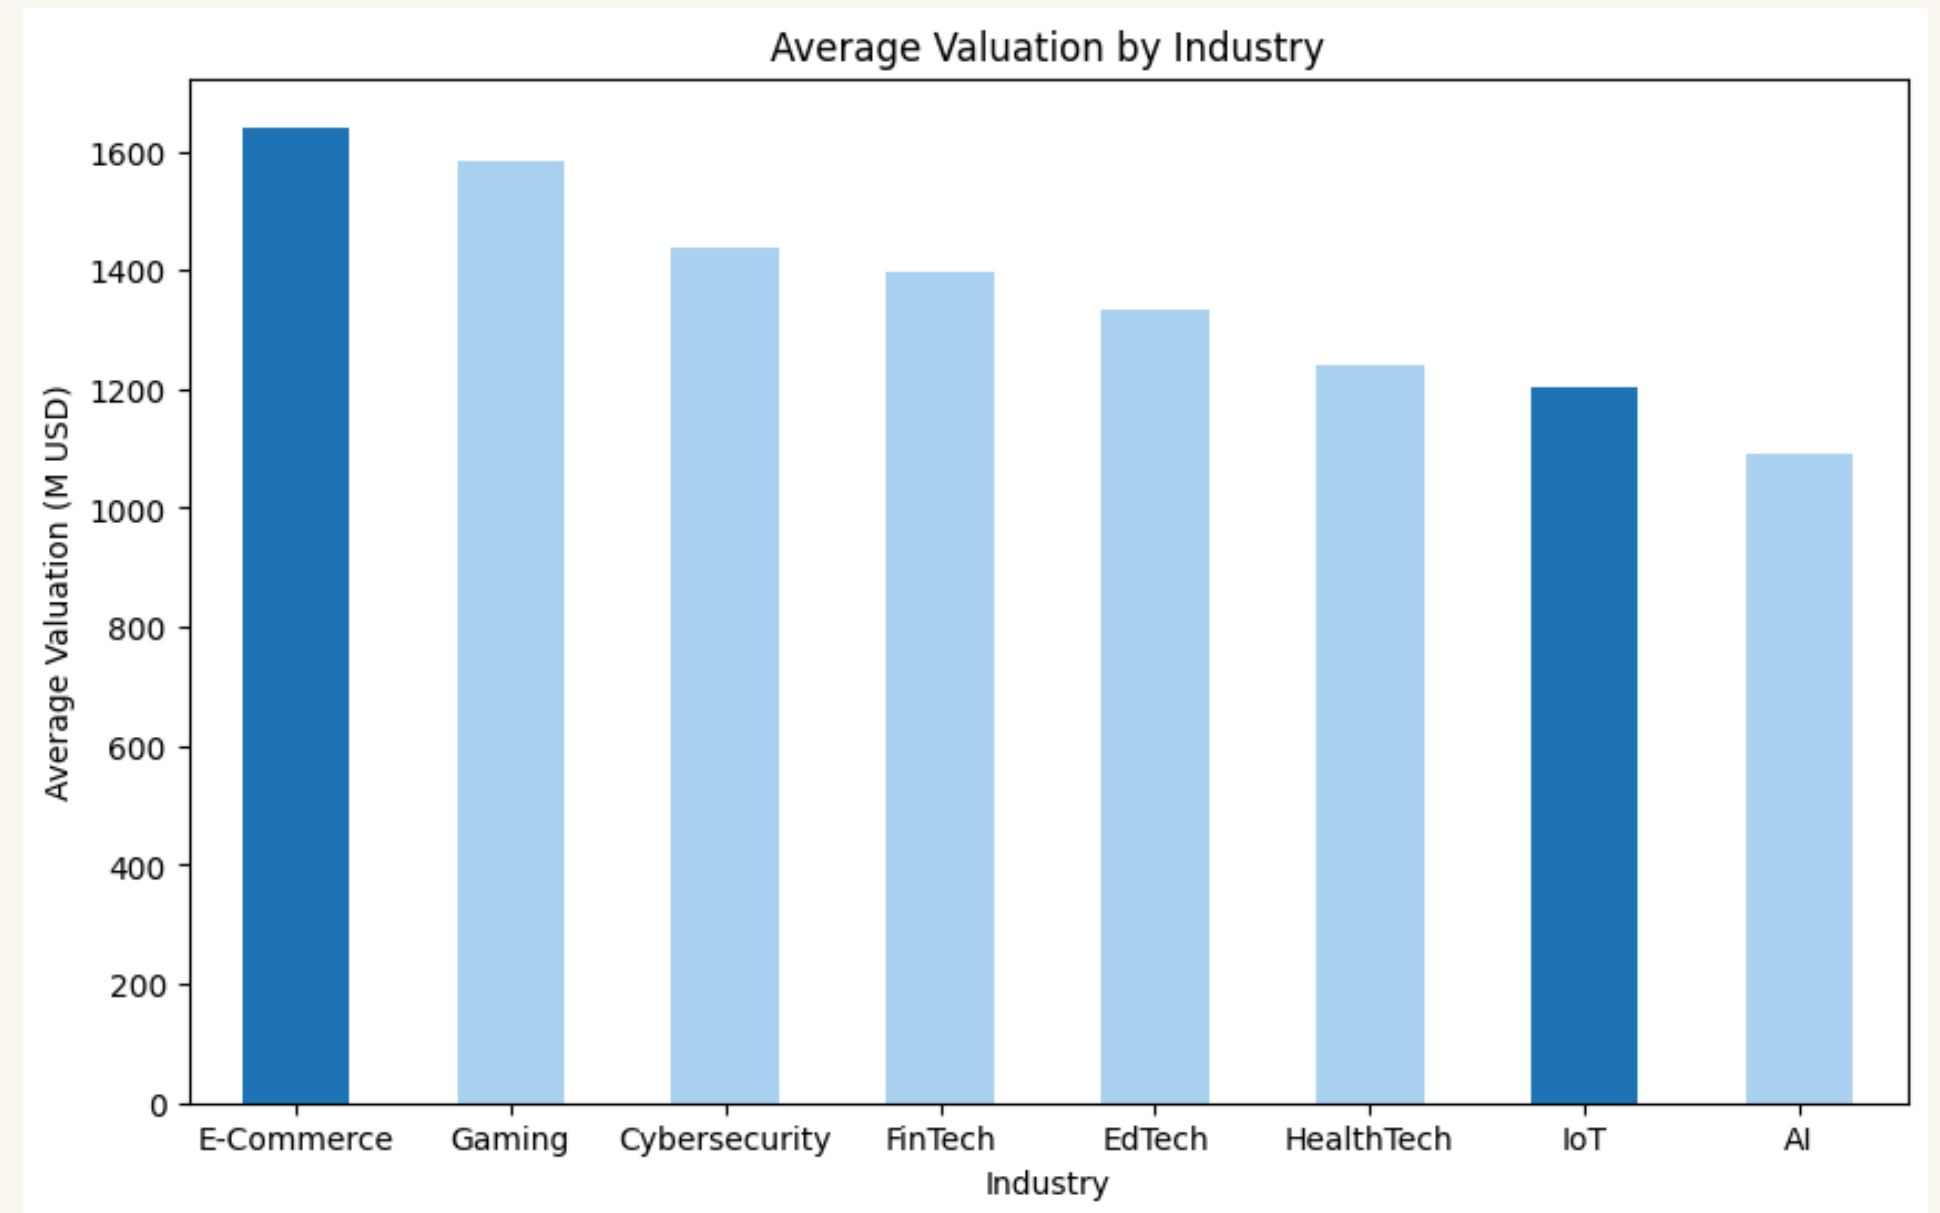

- E-Commerce: 164.6 (M USD)
- IoT: 131.9 (M USD)

Valuation

E-Commerce has the highest average valuation:

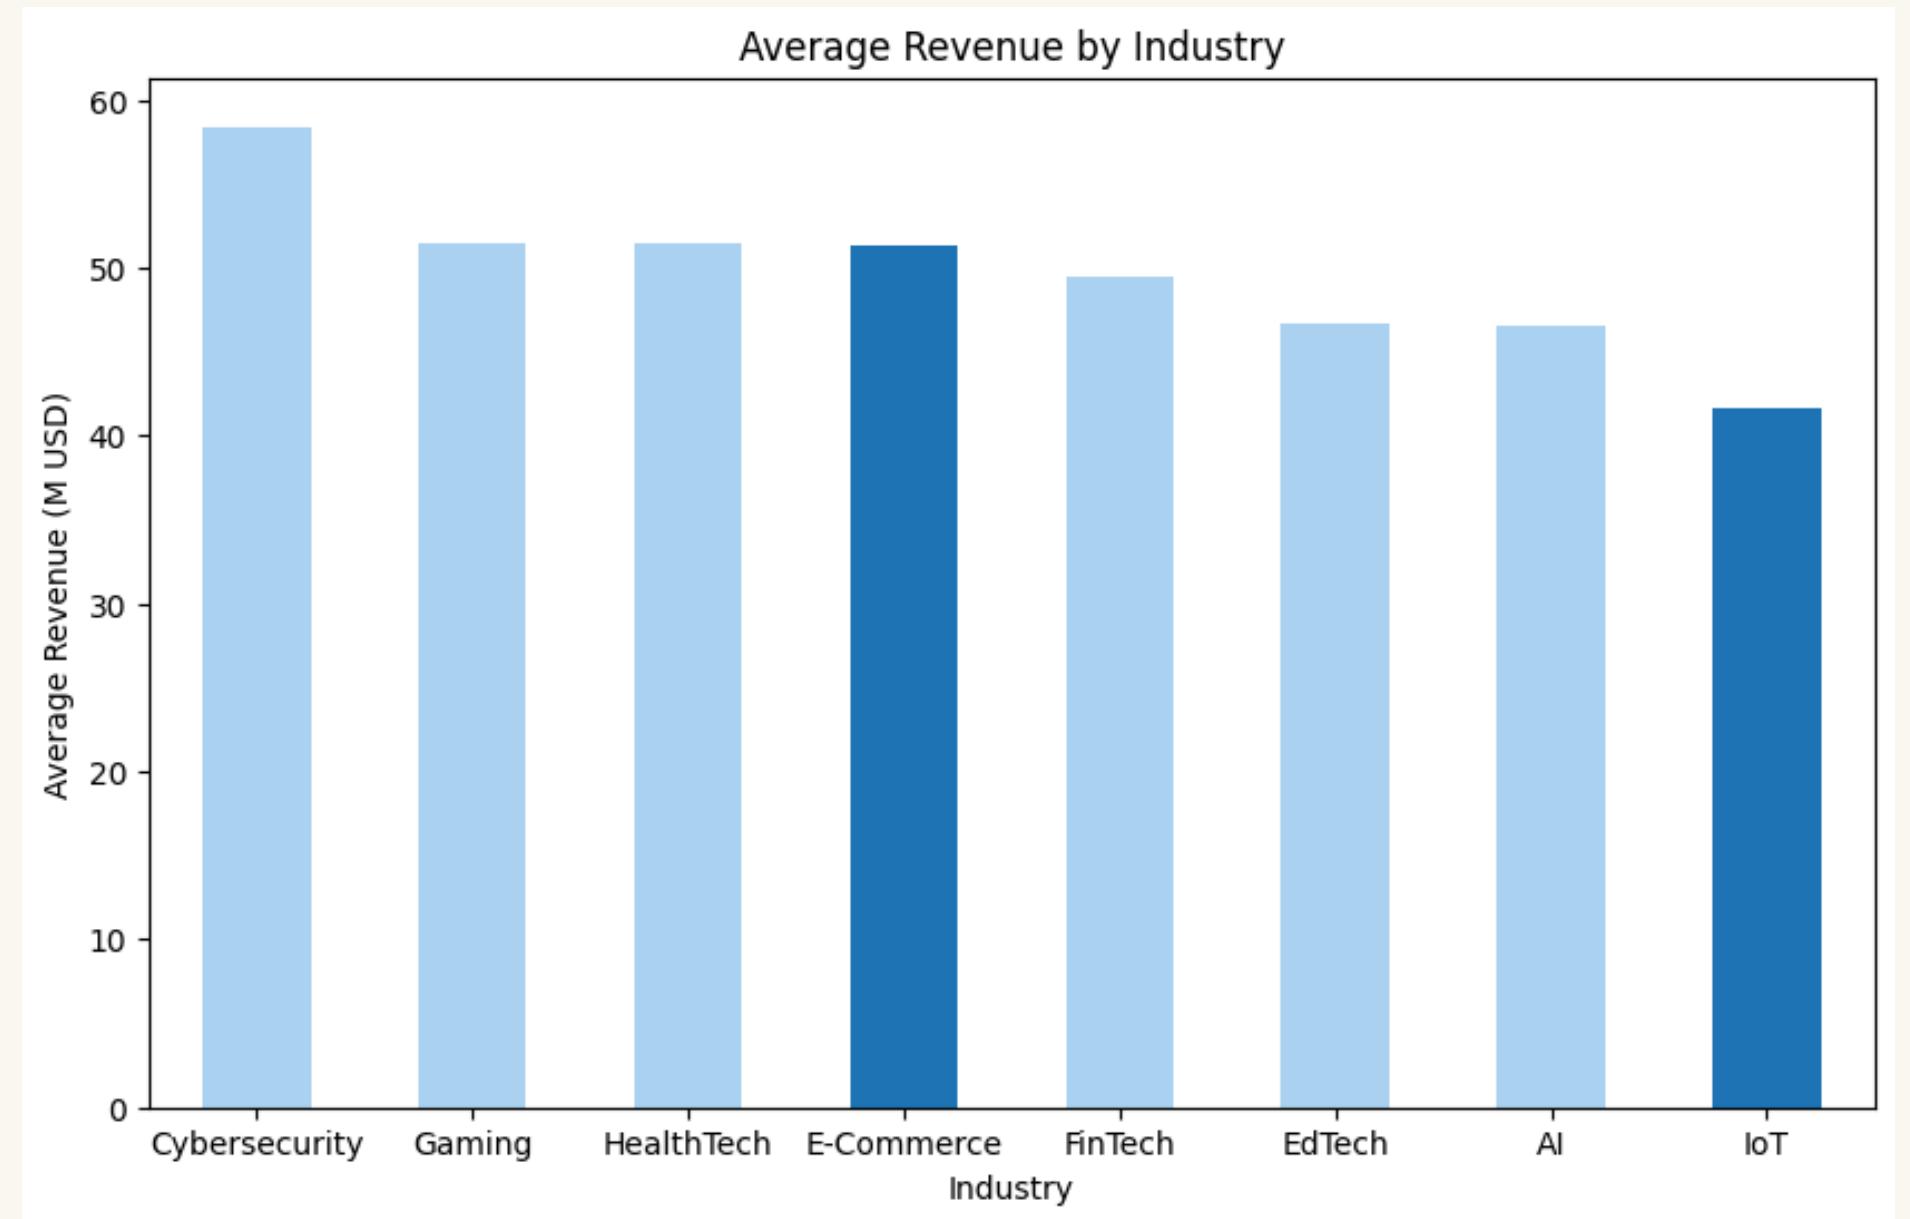

- E-Commerce: 1640.4 (M USD)
- IoT: 1203.1 (M USD)

Revenue

E-Commerce has higher average Revenue than IoT:

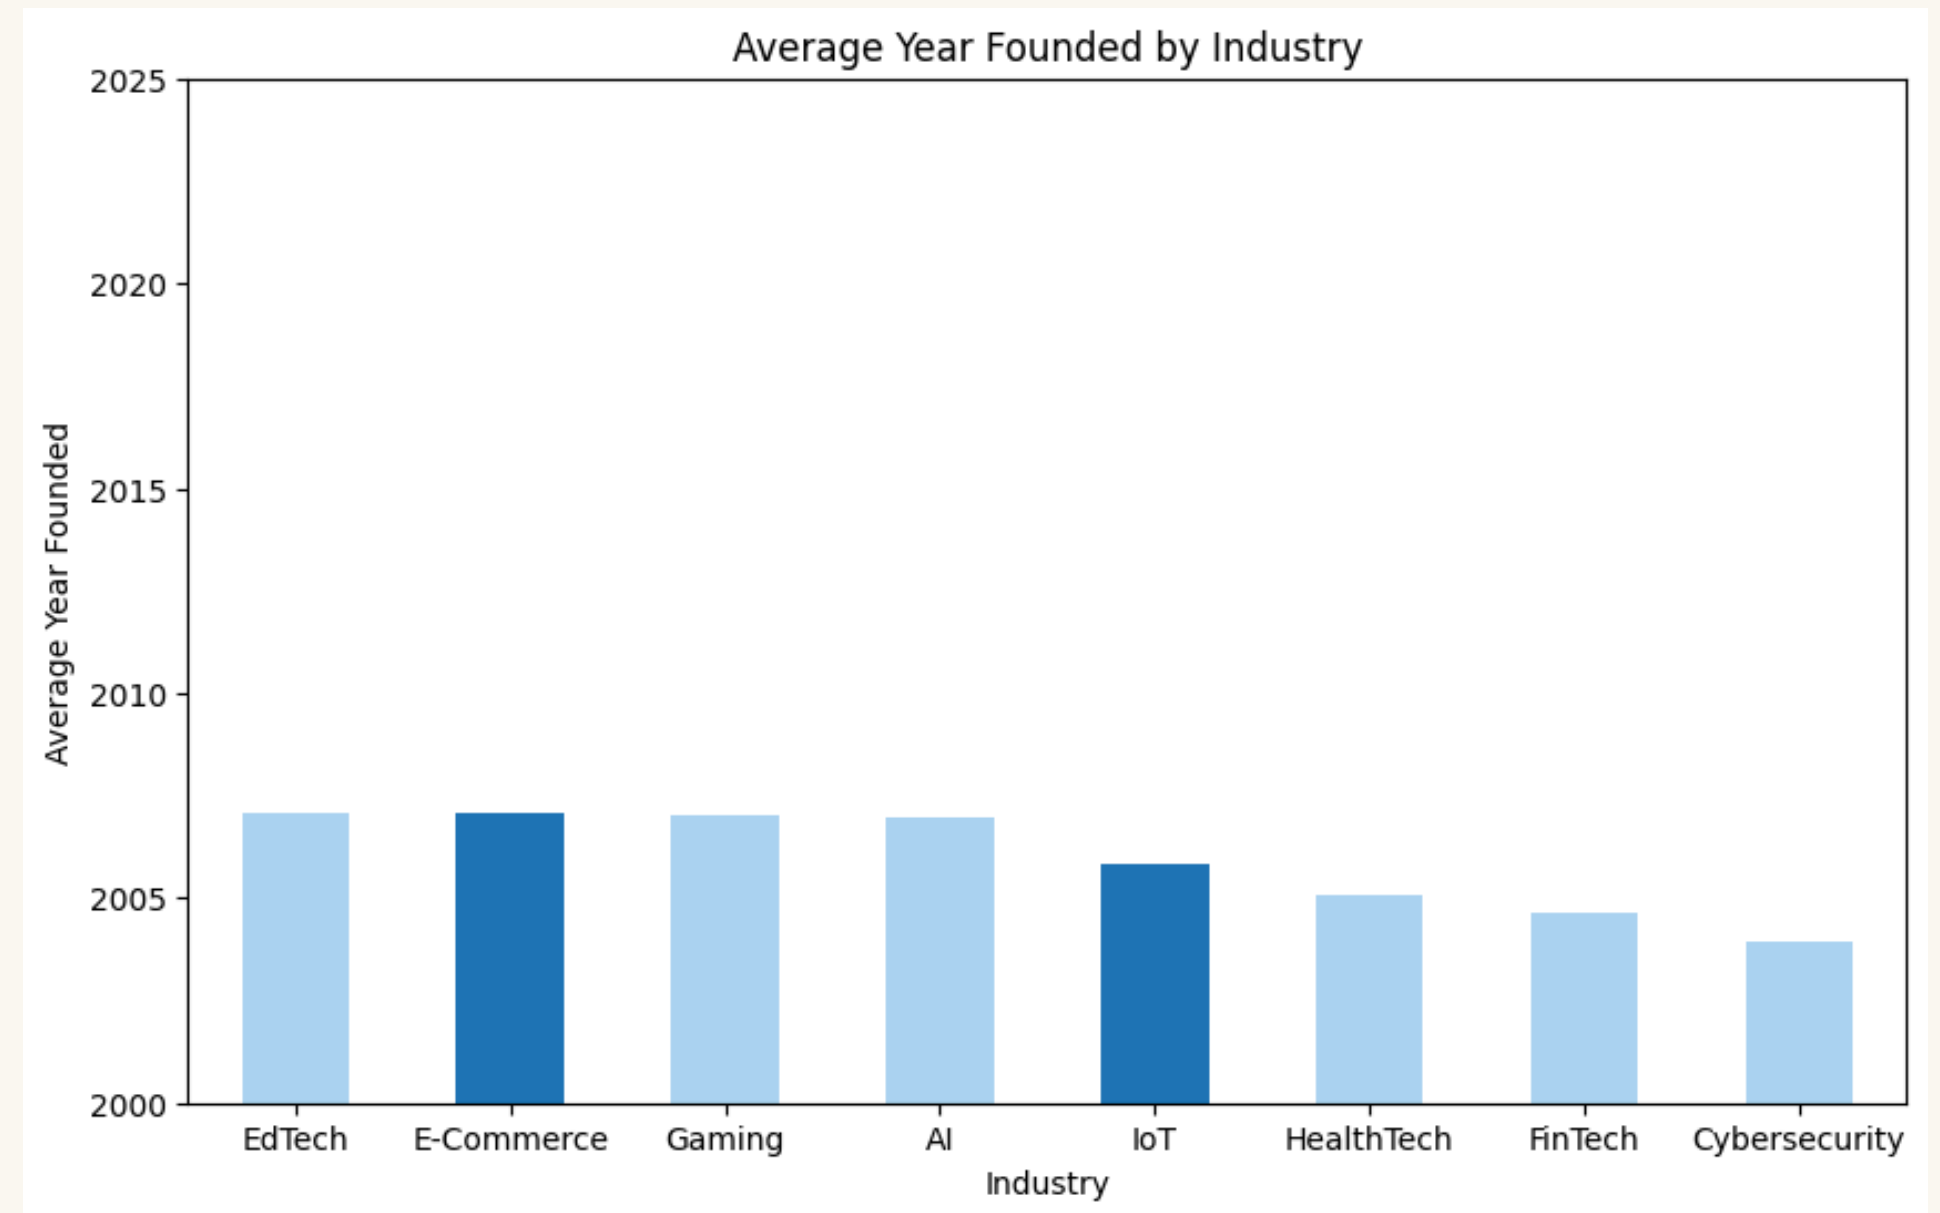

- E-Commerce: 51.2 (M USD)
- IoT: 41.6 (M USD)

Year Founded

There is a tendency for start-up to join E-Commerce more than IoT, average year founded:

- E-Commerce: 2007
- IoT: 2005

What We Learned

Why we recommend E-Commerce

- E-Commerce needs fewer employees to work.
- There is a tendency to invest in the E-Commerce industry.
- E-Commerce is valued more than IoT.
- E-Commerce has higher revenue.
- There is a proliferation of new startups in the E-Commerce industry.

What to do next

Do research

- Check on successful study cases in the industry.
- Understand the law.

Prepare

- Human resource.
- Capital.
- Networking.
